

At the beginning of the lock down in Massachusetts, people were panicked and had no masks. The Chinese community in Weston where I live quickly formed a donation group – WeStar Alliance. We soon collected over 100,000 dollars. With the help of Doctor Wu, we were able to purchase masks, googles and face shields. I also donated money to help people using 3D printer to print face shields. We then delivered the medical supplies to hospitals in Boston and the Weston Fire department as well as Weston Nursing homes.

Later on, we learned that more and more COVID 19 patients were sent to hospitals, causing the doctors and nurses to work long hours with no breaks. WeStar Alliance soon raised money and bought food and drinks to send to hospitals. I was able to decorate the lunch bags with my friends, and I am so proud to be part of these great activities with mom.
